### **E-Commerce Website(Single Page)**

Description: This explains how it works and single-page website is slightly different than a one-page website. One-page websites are literally one-page; there are no navigational links to give you the illusion that the page is changing.

Tech stack: HTML 5, CSS, Bootstrap

### **Advance E-Commerce Website**

Description: Implements the functioning of an E-commerce Website that contains all navigation links like Sign Up, Logout, add to cart, billing, and much more...

Tech stack: HTML 5, CSS, Bootstrap

### **Fan Speed Control Based On Temperature For Public Places To Save Power**

Description: This project is a standalone automatic fan speed controller that controls the speed of an electric fan according to our requirement and the use of embedded technology makes this closed loop feedback control system efficient and reliable. The sensed and set values of the temperature are displayed on the LCD.

Tech stack: Arduino UNO, Embedded C
